Albert Oeming, Prop.

LOCAL NEWS.

Mr Ed Oatway was visiting this week with his brother, Dr Oatway.

Stony Plain was treated, last evening, to some real dance music, when Martin's orchestra, of Edmonton, motored out and put on a dance. As usual, a crowd flocked to the hall, to trip the light fantastic to the good music supplied by these good players.

Several more parties of German and Czechoslovak immigrants arrived this week, and most of these were placed with local farmers on their arrival. Mine Host Albert Oeming expects a larger number of these immigrants will arrive this spring, than ever before.

The town band paraded the other evening, serenaded a number of its friends on Main street, and took up a collection in aid of the band fund.

Mr Alec Poelzer has moved from his old stand and has gone into partnership with Wm Barth, in the old Postoffice building on Main St.

If your eyes bother you, or you suffer from headaches, why not have your eyes attended to by an expert? M M Mecklenburg, eye specialist, will be in Stony Plain on Friday, May 11th.

Death in Stony Plain.

At 10:30 Saturday evening there passed away, in Stony Plain, Mary the elder daughter of Mr and Mrs Jas. Warner. Deceased was in her 19th year, and had been a sufferer from tuberculosis for several years.

The funeral took place on Tuesday, Rev W J Whelen conducted the burial service.

The parents have the heartfelt sympathy of all in town and district in their sad bereavement.

Fire at Old C. N. Station

On Thursday last, shortly after the town bell had announced the noon hour, a fire was discovered in a large pile of "dipped" logs close to the old C. N. station.

A rally of those persons nearby was made, and an effort made to get the fire-extinguishing apparatus to the scene of the blaze.

The auto which had the chemical engine in tow made too short a turn at Christie's corner, and the engine toppled over on its side. The machine was righted, and again headed for the fire.

A farmer's team had been commanded and hitched to the water tank on wheels. This did good service.

Shortly after this the fire was subdued, and all hands left for their homes to resume feeding operations.

Empire Builders

Empire Shopping Week, which was observed throughout Canada last month, appears to have made an especially strong appeal to the people of Western Canada. This may be surprising to many people in the Eastern provinces who are still laboring under the delusion that British and Empire sentiment is not overly strong in the West, and that it has been weakened by the influx of settlers of other than British origin. But it is not surprising to the average Westerner; on the contrary, he is told it is but the natural outcome of the thought and outlook of the West.

It is not in the East, but in the West, that the strongest approval is given to the British Preference feature in the Canadian tariff, and it is in the West, rather than the East, that public opinion favors further, albeit gradual, extensions of that Preference with a view to a lowering of duties and still greater encouragement of British trade in this Dominion. In fact, there is a very strong sentiment in the West which would welcome the development of Preference to the point where all customs duties on British-made and British-produced goods were wiped out entirely.

Empire Shopping Week had for its object the focussing of people's attention upon certain economic factors in the development of Canada as a component part of the British Commonwealth of Nations and of the Empire as a whole. Undoubtedly, sentiment provides a mighty urge to all Canadians to give a voluntary preference to Empire goods when making purchases, but, as was the case with prohibition of the liquor traffic, sentiment is not in itself sufficient. It is the economic factor which, these modern days, provides the most powerful argument. And Western Canada is profoundly interested in the economic factor.

World trade today is, as it has always been and always will be, a system of barter—the exchange by one country of those products and articles of which it produces surplus to another country which requires these articles and is willing to pay for them in other goods of which it has a surplus to offer. The only way that an empire can come into being is to enrich the blood, and it is because of their wonderful blood-richening and blood-making properties that the English have won such great success in the treatment of this often most stubborn disease.

A number of young girls who were in an anemic condition owe their present good health to Dr. Williams' Pink Pills. One of these, Miss Kate MacEwan, Fort Hood, N.Y., says: "I began taking Dr. Williams' Pink Pills at the age of 16 years, and by which time I was again enjoying good health. I hope my experience will lead other sufferers to this method of cure."

If you are at run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are made in exact precision and will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Uncanny Inventions

Exhibited in London

One Machine Types, Adds, and Multiplies At Same Time

Uncanny efficient inventions were to be seen at the Business Efficiency Exhibition at Holland Park Hall, London, Eng., recently. The devices shown included: An electric machine that opens envelopes at the rate of 30,000 an hour. A machine that types, adds, and multiplies at the same time. A machine that seals, frank, counts postmarks and prints a franking envelope at the rate of 300 per minute. Postals type in colors to match the paper or personal color scheme. A lock which records on a tape the time the door is opened, by whom, and whether from the outside or inside of the room.

NEGLECTED ANAEMIA

Often Leads To The Most Serious Consequences

In no disorder is delay or neglect more dangerous than anaemia. Usually the first noticeable symptom is pale lips and cheeks, dark rims under the eyes and a feeling of weariness. Then follow headaches, backaches, and various aches and pains. The only way that anaemia can come is to enrich the blood, and it is because of their wonderful blood-richening and blood-making properties that the English have won such great success in the treatment of this often most stubborn disease.

A number of young girls who were in an anemic condition owe their present good health to Dr. Williams' Pink Pills. One of these, Miss Kate MacEwan, Fort Hood, N.Y., says: "I began taking Dr. Williams' Pink Pills at the age of 16 years, and by which time I was again enjoying good health. I hope my experience will lead other sufferers to this method of cure."

If you are at run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are made in exact precision and will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Has Unusual Occupation

For twenty-three years Lawrence Quinn, chief oysterman at the Hotel Lincoln, New York, has been opening oysters for a living. He opens an average of 3,900 oysters a day, and during his twenty-three years in this work has found dozens of pearls. None of the stones were of fabulous value, but there have been enough small ones to make a fine necklace and some pendants, and Quinn still has hope that some day he will pick up one that will be of real value.

Minard's Liniment Powers to Cure Indigestion

Minard's Liniment Powers to not need the after-help of castor oil, or any purgative to complete their thoroughness, because they are thorough in themselves. One dose of them, and they will be effective in curing children's cold and the worst trouble by making the stomach and bowels untenable to the parasites. And not only this, but the powders will be certain to exert most beneficial influences in the digestive organs.

"Dry Ice" New Idea

Substitute Has Been Used Successfully In States

By the use of "dry ice," or solidified carbon dioxide, the price of ice cream will be cut considerably within the next few years, says Fred Rasmussen, of Harrisburg, executive of the International Ice Cream Manufacturers' Association, during the annual convention of the body.

Only fifty pounds of the "dry ice" will supply the needs of an ice cream delivery truck for nearly a day, he declared, and use of the substitute will spread rapidly when it is made in quantity. It is now being used in transporting ice cream by truck from Philadelphia to Atlantic City.

Winnipeg Population

The official figure of the population of Winnipeg proper for 1923, as given by the Assessment Department, is 292,377. Not since 1910 has the 200,000 mark been reached. This year's figure is exceeded only by the population totals for 1914 and 1915, when the figures were 208,256 and 212,889 respectively.

Indigestion

One tasteless spoonful in water neutralizes excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude salts. Use what your doctor would advise. Use Phillips' Milk of Magnesia.

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude salts. Use what your doctor would advise. Use Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Cuticura Shaving Stick 25c.

A Region Of Wondrous Beauty

Pleasure Made For Establishment Of Government Park In Bella Coola, B.C.

If you like to get out in the wild country and hunt wild animals, such as grizzlies, with the camera, by all means go to the Bella Coola Valley, B.C. I have spent the last four summers there, and I am advocating the establishment there of a Mackenzie Park, to be known as MacKenzie Park, in honor of the first white man who crossed Canada and who reached the sea at that point—this to be connected up by means of a highway to what is known as Mackenzie Highway, paralleling part of Mackenzie's route so that people can go from New York to California and to Bella Coola over the Mackenzie Highway, visiting Mackenzie Park and returning by way of the Rocky Mountains Park, and so on. This would bring money into British Columbia and Canada. If the Dominion will not carry out this plan I hope to get some wealthy men interested, as the region is one of wonderful beauty. Within a distance of 70 miles it is easily traversed in a motor boat or auto, and one can visit both the so-called rainy coast and the desert interior. One can go from sea level to 12,000 feet, can have boating on both salt, fresh, swift and still waters, paddling, poling, motor boating, sailing, etc. There is excellent trout fishing and good animal photography, grizzly bears being very numerous. Thousands of waterfalls, one of them over 800 feet high; 18 glaciators have been seen from one place, and there are many others. It costs only \$4.00 for a round trip from Vancouver by boat through the fjords of the Norway of Canada. I have taken my first moving picture, showing life in this region. Board in the valley can be had at 50 cents a meal, good cream, fresh fruit, kindly nice people, largely of Norwegian descent, noted for cleanliness, and good cooking. Please let me know of anybody who will help me get this park and highway established. We should get about 20 miles wide by 70 miles long of country which is still in the Crown; that is, it is government land, and it is of practically no commercial value except for park purposes.

—Harold T. Smith, Department of Mines, Ottawa.

Forest Lined On Temperatures

Forests have an equalizing effect on extremes of temperature. Records for Canada show that in forested districts maximum temperatures are lower and minimum temperatures higher than in adjoining deforested areas.

FIRST CONTRACTS AWARDED

Canada's Air Mail Service Will Eventually Cover Dominion

The nucleus of a transcontinental aerial mail service is being established by Canada with the awarding of contracts for four important mail services. Eventually letters will cross the country from Halifax to Vancouver in 36 hours by aeroplane, instead of in five days by railway as at present.

The contracts now entered into provide for a service between Father Point and Montreal and Ottawa, another service of four trips per week between Montreal and Toronto, and all-year-round service between Montreal and Albany, N.Y., to connect with the United States Transcontinental Air Service. The total cost will be \$201,150.

The Father Point to Montreal service and the Montreal to Ottawa service will be provided by the Canadian Transcontinental Airways Limited, of Quebec. The Father Point to Montreal section costing \$49,500, or \$1.25 per flying mile. The Montreal to Ottawa service is to cost \$8,250 for the season. For the Montreal-Toronto service the cost will be \$40,500, or \$1.25 per flying mile, and the Montreal to Albany service will cost \$6,900.

According to J. A. Wilson, Director of Civil Aviation in Canada, 60 per cent of the Royal Air Force pilots during the war were Canadians. Since the war Canada has been devoting her activities to such operations as forest protection, surveying, mapping and the carrying of engineering and geological survey work in the northern region. It would take some time to build up a transcontinental air mail service, owing to the sparse population of the Dominion, but eventually the people would demand more rapid service than could be given by the present method.

An Oil That Is Prized Everywhere.

—Dr. Thomas' Electric Oil was put on the market within the last four years. It came into existence a few years ago. It came up to meet the wants of a small section, but as soon as its merits became known it had a whole continent for a field, and it is now known and utilized throughout this continent. There is nothing equal to it.

A Chicago manufacturer has invented a photographic machine that can produce 4,000 finished prints in an hour.

Minard's Liniment for Toothache.

It is estimated that \$100,000,000 is annually spent in U.S. for retail store display advertising.

Hardy Norse Explorers Make Trip To Barren Lands On The Coppermine River

Waking the echoing silence disturbed only at long intervals by white men over the centuries, two young Norwegians — Hjalmar Nelson-Dale and Hege Ingstad—are today, if all goes well with them, beating their dangerous way back across the barren lands from the headwaters of the Coppermine River.

Only twice in the last 160 years, so far as is known, have white men penetrated to the source of the river in the mysterious hinterland through which the Coppermine River flows.

Its discovery was made in 1772 by Samuel Hearne, following an earlier attempt in 1769, when the desertion of his Indians compelled abandonment of the effort.

Hearne's successful expedition of 1770-1772 was marked by the massacre—which he was unable to prevent—of a peaceful Eskimo tribe by his own Indians, and history has marked that fatal spot on the map of the Northwest with the name of "Bloody Falls," the slaughter occurring close by some falls on the Coppermine River.

Then in 1821 came the thrilling and ill-fated Franklin expedition, which traversed 5,550 miles out and back across the barren lands from Hudson Bay, to leave the bones of many of its members lying in the inhospitable earth over which the survivors dragged their weary way.

Another 100 years almost elapsed until, in 1924, G. H. Blanchet, of Ottawa, made his brilliant dash into the

unknown to discover the outflow of water through a rock wall of an elevated lake from whence, looking northward toward the Arctic, the peaceful Coppermine meandered slowly through broad plains dotted with herds of caribou, to the shores of the Northern Sea.

It was in the summer of 1927 that the two young Norwegians—Nelson Dale was born in Canada, and so is Norwegian—left Edmonton for their destination, there to start out on the first leg of their hazardous journey.

In July, 1927, they wrote to O. C. Boness, Edmonton lawyer, that they were leaving Resolution—last outpost of civilization—in a few days and that if all went well they hoped to reach the Coppermine river in the fall of that year, spending a year in the "terra incognita," and returning to civilization by dog train.

The fall of 1928 should see the two adventurers safely back provided they have met with no mishap.

Ingstad is a qualified attorney-at-law in Norway and for some time was correspondent for "Tidens Tegn," the largest newspaper in that country.

His partner has hunted and trapped in the north for some years and went north with Ingstad after a trip home to Norway in 1926-27.

Neither adventurer apparently was aware before he left that Mr. Blanchet had preceded them by three years in their attempt to reach the Coppermine river head waters.

BRITISH NAVY PROMOTIONS

At the youthful age of 42, Capt. Gordon Campbell (V.C.), (left), has just been made rear-admiral in the British Navy. Vice-Admiral Sir Frederick Field (centre), has been promoted admiral, and Admiral Fremantle has been placed on the retired-list at his own request in recent navy changes.

Build Mammoth Grain Elevator

New Wheat Pool Elevator At Fort William Will Be Most Modern For The Continent

The board of directors of the Saskatchewan Co-operative Wheat Producers, Limited., has awarded the contract for the erection of the super-structure of Pool Terminal No. 7, Port Arthur, to the Barnett Queen Construction Company, Port William, Ont.

This new terminal elevator, which is being built by the Saskatchewan Wheat Pool, will be the most modern and the fastest terminal grain elevator on the North American continent, according to C. D. Howe, of C. D. Howe & Co., consulting engineers, Port Arthur. It will have two stories of 3,000,000 bushels each, in addition to a work house with a capacity of 900,000 bushels, and it will be able to take delivery of 890 cars of grain in ten hours, or 500 cars per day during the rush season. It will have a shipping capacity of 150,000 bushels per hour, and a drying capacity of 1,000 bushels per hour.

"Waiter, I am going to die. Bring me a beer!"

"Yes, sir. Light or dark?" — Mousie, Charlie.

Film Wild Game Life In Alberta

Noted Hunter Will Spend Summer Months In Mountains Of Jasper Park

The moving picture camera, and not the death spitting rifle, is the weapon of Major A. Radcliffe Dugmore, well known wild animal photographer of England, who has reached New York after an extensive expedition through the wilds of Africa, during the course of which he recorded on film the habits of animals ranging from the nimble and elusive gazelle to the ponderous and fury rhinoceros.

To round off his experience of game photography on four continents, Major Dugmore is considering spending the coming summer on a two or three months' journey by pack horse through the mountains of Jasper Park, Alberta, where he will be able to "shoot" Rocky Mountain sheep, goat, caribou and bear.

Major Dugmore will probably commence his journey from Berg Lake, at the foot of Mount Robson, 12,972, the highest peak in the Canadian Rockies. With him will be his wife and daughter, "Bans" Dugmore. The latter is as keen a camera enthusiast as her father. Since she has been fourteen she has been with him on his quest of game photography.

Major Dugmore holds no brief for the slaughter of game with firearms. The camera, he states, offers better sport, provides more effective and durable trophies and demands greater skill in stalking.

Large Area Of Forest Land

Of the total non-agricultural area of Canada about one-half can be made to produce timber crops if permanently dedicated, protected and managed to that end. Investigations show that the only economic use for one-third of the land area is in the growing of wood.

DUCHESS OF YORK

Canadian "Moth" Planes Are Helping To Combat Spread Of Wheat Rust In West

How Canadian "Moth" planes are helping to fight wheat rust in the West is told in a statement made public by the Department of Agriculture, as follows:

"It would be almost impossible to imagine two more widely separated things than an aeroplane and the rust which attacks our wheat. Yet we find the Royal Canadian Air Force co-operating with the Department of Agriculture through the Entomological plant pathological laboratory at the Manitoba Agricultural College, Winnipeg, in the great work being done by Drs. D. L. Bailey and C. H. Goulden in studying and formulating a plan of control for one of Canada's worst and most costly enemies."

"The aeroplane has been extensively used for the purpose of locating diseased conditions in our forests, and also in dusting from the air for the control of the spruce budworm. The work differs considerably, however, in connection with wheat rust and consists mainly in the exposure of slides at different altitudes and in different locations. These aeroplane exposures attempt to collect from altitudes of from one to five thousand feet the date of the earliest appearance of rust spores, the region over which they first appear, the rate at which the spore content of the air increases, and the relationship of the ability of spores caught at these higher altitudes, and the relation of certain environmental and climatic factors to the rate of development and spread of rust."

The air force stations at Lac du Bonnet, Norway House, Cormorant Lake, and High River, have assisted in this work. Each station is supplied with tightly stoppered bottles containing wooden paddles to which are attached microscope slides lightly smeared with vaseline. These slides are exposed for 13 minutes of varying altitudes, the slides replaced in the bottles and then returned to the Government laboratory at Winnipeg.

"In one instance at Lac du Bonnet a surprisingly high number of spores was caught on a slide, which seemed to indicate the plane at an altitude of 5,000 feet had travelled through a pocket or eddy of air where the concentration of rust spores was very dense. Where the spores originated is speculative, but the fact that at the time threshing was being done at Morden, where there was a heavy local outbreak of rust seems to point to that district as the originating point. When the patchy nature of these outbreaks is considered, one is led to suspect that there may be some relation between these clouds or eddies of spores and localized heavy field infections. One can well imagine a rain washing down these spores on a more limited area, where they would germinate and produce a heavy infection."

"The Department of Agriculture has proved on several occasions the efficiency of the aeroplane in many lines of investigation, and the day may not be far distant when "Moths" will be common in our agricultural communities."

Construction work on the last part of the trans-Canada highway will be started next month. The finish of the last link between Revelstoke and Golden, B.C., will complete a motor highway across Canada from Halifax to Vancouver. The above illustration shows the route and indicates the portion just being completed.

PRAISES CANADIAN HOSPITALITY

Baron Perenyi, Minister of the Interior for the Republic of Hungary, who visited the Hungarian settlements adjacent to the lines of the Canadian National Railways in Western Canada recently, expressed himself as much impressed by the help which Canadian-born citizens are giving newly arrived Hungarians in settling on the land and generally establishing themselves in Canada.

"Canada is a place where anyone can make an honest living with hard work," His Excellency said. "All that has been said of Canada is true. It is a land of real opportunity and I shall certainly come back again where I find so many of my countrymen happy, contented and prosperous."

The photograph shows Baron Perenyi on the left and Albert Faiz, editor of the Budapest Times on the right. Mr. Faiz visited Canada three years ago and visited a book, "The Hungarian in Canada," which attracted many Hungarians to Canada.

German Settler Booms Canada

During Trip To Homeland Induces Thirty Young Men To Migrate To Dominion

Carl Schulz, of Uckermann, Brandenburg, Germany, who came to Canada a year ago and purchased 1,000 acres of unbroken land on the Canadian National Railways near St. Walburg, Saskatchewan, proved to be a good colonization agent for Canada. Following his purchase he returned to Germany to settle matters regarding his estate there and while in his homeland he talked the general of Canadian opportunity. The result was that when he returned to Winnipeg recently he brought with him thirty promising young men and more than one hundred are following as soon as they can dispose of their interests overseas. The twenty will work with Mr. Schulz until they are able to take up land of their own.

Mr. Schulz says that a very heavy immigration to Canada from Germany can be looked for starting next year. Thousands of young Germans are turning their eyes towards Canada and will come as soon as they can dispose of their holdings in Germany.

"This is intolerable. I have found a button in the soup."

"Lucky man. The management gives a glass of brandy to whoever discovers a button in the soup."

Buen Humor, Madrid.

AFTER ALL
There's Nothing
To Equal
Zam-Buk
FOR THE SKIN!

WORLD HAPPENINGS BRIEFLY TOLD

Henry James Cambie, pioneer railway builder and explorer, died at his home in Vancouver, at the age of ninety-one, after a brief illness with pneumonia.

Coal production in Canada during March was slightly less than in February. Alberta produced 619,063 tons. British Columbia's output was 251,832 tons.

Capt. George H. Wilkins, scarcely landed from his greatfeat of flying across the top of the world by seaplane, already is planning a new adventure—this time over the Antarctic at the other end of the world.

The government is of the opinion that women should have the right to sit in the Senate and means will be devised to amend the British North America Act to permit appointment of women to the upper chamber.

The resignation of Sir Henry Dryden as member for West York was announced in the House of Commons. He has accepted the appointment of chairman of the Ontario Liquor Board.

A notice of motion for the tabling of correspondence between Canada and Great Britain on the subject or titles for Canadians has been given by C. H. Cahan, Conservative, St. Lawrence-St. George. The motion also calls for a list of foreign honors and decorations conferred on Canadians since 1919.

Dr. Henry M. Tory, president of the University of Alberta since its organization, 20 years ago, is tendering his resignation, to take effect at the end of the current college year next month, in order that he may accept the permanent chairmanship of the National Council of Scientific Research, with headquarters probably at Ottawa.

Mother can usually know when her children are troubled with worms and they lose no time in applying a reliable remedy—Mother Graves' Worm Exterminator.

Will Soon Banish Weeds

A new law passed by the Quebec Government makes it compulsory for every person to destroy all noxious weeds on his property whether that property is cultural or not. These weeds must be destroyed before they go to seed, and if the owner fails to carry out this work the authorities will step in and do the job, charging the farmer with the cost of removal.

The cries of sea-birds, especially seagulls, are very valuable as fog signals. The birds cluster on the cliffs and their cries warn boatmen that they are near the land.

Short of Breath Dizzy, Sinking Spells COULDN'T WALK FAR

Mr. L. A. Oliver, Granville Ferry, N.B., writes: "For years and I don't know how many, I could hardly stand up without taking hold of something to support me, and I could not walk any distance on account of being so short of breath. I consulted my doctor's medicine, but it did me no good, only for the time being, so reading in the B.H.B. almanac about

I decided to try them and found them to be just what they are recommended to be, and I feel that I owe my life to them."

Price 60c. a box at all druggists and dealers, or mailed direct on receipt of 25c. by The T. Milburn Co., Limited, Kitchener, Ont.

Financing Is a Specialty

When Contemplating Investments Wise People Consult a Banker

News items about agents of phony stock being sent to jail and about others who escape the law, are not infrequent today, and it makes sorrowful reading, for the reason that so many of their victims are people who have invested their hard-earned savings to these agents or promoters. Yet there are many worth while concerns in which one may invest with safety. How can the good be distinguished from the bad? Very often they can't be. But those who have money to invest can be surer of their ground if they will consult their bankers or some other reputable financier.

When you're sick you consult a doctor; when you need the law, you see a lawyer. Financing is a specialty as intricate as medicine or law. Therefore see your banker before you loosen your purse strings.

Winnipeg Newspaper Union

A Graceful Afternoon Or Evening Frock

Exceedingly graceful is the frock pictured here. The two-piece pointed skirt is gathered to a bodice having a wide belt. The belt is gathered, thereby giving a graceful line. The attractive arrangement of the surplice effect is effectively shown, and there are long shirrings at the front and back. The long pointed bodice may be omitted for evening wear, if desired, thereby making this frock suitable for many occasions. An addition of contrast is provided by the flowers placed at the shoulder and hip closing. No. 1501 is for misses and small women, and is in sizes 16, 18 and 20 years old. Price \$13.00, or 30c. per yard 30-inch material, or 2½ yards 54-inch, and ¼ yard all-over lace for the shields. Price 25 cents each.

Many styles of smart apparel may be found in our Fashion Book. Our designers originate their patterns in the heart of the style centres, and their creeds are those of tested popularity, brought with the means of the average woman. Price of the book 10 cents the copy.

Old Lady: "And what should a polite little boy say to the lady who has given him a half-penny for carrying her parcels?"

Little Boy: "The too polite to tell you, ma'am."

Don't try to do the smallest amount of work possible for the pay you get.

Small Town-Papers

BY FRANK PARKER STOCKBRIDGE
Reprinted by special permission from Saturday Evening Post, April 1, 1928, by Curtis Publishing Company, Philadelph.

(Continued.)

"The total circulation of these 11,500 country weeklies is about 9,500,000 copies a week, and doesn't seem like much to a New Yorker, accustomed to circulation figures in the hundreds of thousands. But there are only 10,000 dailies in the United States which have a mean of 10,000 circulation, and the whole list of dailies circulates only about 33,000,000."

"It doesn't take a large circulation to make a country weekly profitable. Bert Mills and some of the rest of you chaps are the magnates of the business. Remember that an income of \$5,000 a week is a whole lot of money! It's the equal of at least \$10,000 a year in Chicago or New York, but in a small town it's hard to do for himself and his family a whole lot more than the average man in the same sized town makes; as much, I might say, as anything else in town is likely to do for the general merchant. And I don't think I'm far wrong when I say \$3,000 a year is probably the minimum net profit for country weeklies, with the average closer to \$5,000. If I'm wrong somebody correct me."

"Sounds all right to me," said an elderly man, who had been listening but listen! "I personally know at least fifteen country publishers in Iowa who make more than \$5,000 a year from their papers. It's a poor publisher who can't do better. You can't earn 20 per cent a year on his investment in this business, and I guess our average plant investment is nearer \$20,000 than it does \$10,000."

"That will come pretty close to it," said one of the others, who turned out to be a represented manufacturer, carrying a good line of printing-apparatus machinery. "Take the main items and check me up. First is the typesetting machine, a line caster and type like it, big, tiny paper, and Mighty few country papers haven't got one machine, many have two; the average is about a quarter of a dollar per thousand dollars is charged for a typesetting machine. The \$10,000 papers are more in demand. So put it at \$4,000 per paper as the average of that item."

"Then there's the press. There may be, somewhere in the United States, a newspaper still being produced on a hand press but I don't know where it is. If I did I'd hunt up the editor and give him a power tool. The old-time country press could be had and often was, printed a page at a time on an Army press that cost \$50. More of them used to be had in the smaller towns, invented by Ben Franklin, which cost \$300 to \$500 and printed two or four pages at a time. Then the cylinder press came in with a cylinder that cost \$100, and then the flat sheets, or a little steam engine to turn the press over. But all those are obsolete now. The two-revolution press is the latest, and comes from the up-to-date flat-bed printing press, printing from the roll. These types of presses cost from \$2,500 to \$20,000; I find a fair average is \$10,000."

"There we have \$30,000 in only the two main items of the plant. But we want to put in hand type and sizes for adding, imposing, changing, folding over, and so forth, the press and another for the machine, and all the rest of the necessary equipment including stereotyping machines, and so on. Certainly there's another \$4,000 there. That makes an average investment of \$33,000 exclusive of building. More country publishers own their buildings than ever, and a \$25,000 building is too high for an average figure of the value of the building, counting in those who don't own their own. There's another \$4,000 there. That makes an average investment in country weeklies well up above \$15,000, and it is increasing all the time."

The advertising agency man had been testing on the edge of his chair, eager to pick up the conversation again.

"Please, sir, give you some more figures," he insisted. "You're wondering where the country editors get the money to invest in their plants, and where their profits come from. Here in the United States there are nearly 60,000,000 people—more than half the population of the United States—who live in these small towns in the country around them. There are still 27,000,000 on the farms, although 500,000 farmer families have moved to town since June, 1927, where they intend to stay. To the big cities! Don't think it, they moved to the small towns, where they are still readers of the country weeklies."

And these 60,000,000 people, instead of being the poorest part of our population, are pretty nearly the richest, on the average. There aren't many millionaires among them, but there are a hundred thousand incomes per family than the big cities average. Here's a survey of Edge County, which shows an average cash income of \$1,400 per family per year, in addition to the rent for most of them and a large part of their food

supply for many of them. That's a big income when you consider how small the living expenses are in rural communities.

"Here's another survey, made by the General Federation of Women's Clubs in July, 1927, of towns under 5,000 population—the exact territory we are talking about. It shows that in these towns there are 1,863 families owning phonographs, 104,410 with pianos, and 68,400 with radio sets.

There are some more government figures, from the Department of Agriculture: The farmers of the United States—those 27,000,000 men, women and children—spend \$3,000,000,000 a year for manufactured goods; they earn one-sixth of the national income, own one-fifth of the national wealth and pay one-fifth of state governments.

"They buy everything. The National Automobile Chamber of Commerce says that 95 per cent of the income of all motor-trucks, more than 50 per cent of all automobiles and, naturally, nearly all the tractors. A recent study by the electrical engineers in 1926 showed that 83 per cent of the homes were wired for electricity. That's a higher proportion than in some good-sized towns in the nearby farm-houses which also have electric current as customers for every sort of electric equipment."

OVER 5 MILLION JARS USED YEARS

An Interesting Edition

London Daily Mail Pictures Events
In Year 2,000

A newspaper as newspaper men thought it would be on January 1, 2000, has been published in London by the Daily Mail.

"Air fire squad section 28 flies to a fire in Regent street and quickly quenches a blaze with its 'Anti-Fire' extinguishers."

"The big murder of the day is that of a man killed by mental suggestion from a woman."

"So greatly, in fact, has the mental power of the race increased that school children play games during the day and through a silent battery of 'memory impressors' do their studying in their sleep."

"Television is a routine part of the day's affairs. A crowd gathers in Trafalgar Square to watch a cricket match between the English and Australian teams playing each other at Sydney, on the other side of the world."

"Captain Ralph Girdstone's 24-hour flight around the world is featured particularly because a noonday sun was shining over him all during the flight. People have to wear 'crash-proof lingerie' because flying is a part of their ordinary daily life."

"The only thing that seems unchanged is the civil war in China, which is still in the news."

"The newspaper—a full-sized one of 24 pages—was published with a Daily Mail exhibition of 'Homes of the Future,' at the Great Olympia."

The difference between an alarm clock and a hen is that when you set a hen she sits there, but when you set an alarm clock it goes off.

Cute in a Baby-Awful at Three—and it's Dangerous
by Ruth Brittain

Much of the nervousness in older children can be traced to the over-stimulation during infancy, caused by the use of a rattle as a sort of amusement toy for the amusement of parents, relatives and friends. Baby may be played with, but not for more than a matter of an hour to an hour daily. Beyond that, however, tickled, caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritation, resulting in colic.

Frightening crying and sleeplessness from this cause can easily be avoided by treating baby with more care and consideration when you just can't see what is making him restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms him down. Baby's mother should never let him sleep with it containin' any drugs or opalates. It is purely vegetable—the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhoea, constipation, fits on stomach and bowel, feverishness, loss of sleep and all other "upsets" of babyhood. Over 25 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you will find a gold book for Chas. H. Fletcher, manufacturer on the package so you'll get genuine Castoria. There are many imitations.

Get with each bottle of Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's name on the package so you'll get genuine Castoria. There are many imitations.

BEATTY STRESSES CANADA'S NEED OF POPULATION

Ottawa.—More executive efficiency and greater administrative latitude under experienced executives commanding high salaries were among the suggestions offered by E. W. Beatty, president of the Canadian Pacific railway.

Mr. Beatty indicated his belief that the present efforts being made by the government and the railways were bringing inadequate results. He approved of the training in Great Britain as a method of eliminating "mifits" from immigrants.

Millions of Canada's 9,500,000 people were of British and French origin, he said.

"This would indicate that we have not yet reached the point at which the admission of additional settlers even in considerable numbers, should cause apprehension," said Mr. Beatty.

"We are all, I think," said Mr. Beatty, "impressed with the fact that Canada has made substantial progress in the last few years but we think progress can be expedited and even greater prosperity follow the admission of more people to this country. I share the views of the president of the National Railways and I agree with others that our ambition should be to admit, first from Great Britain and afterward from the United States and selected continental countries, men who are physically fit, and able, and willing to follow agricultural pursuits."

"If the figures for the past three years are approximately correct that 80,000 per year was the net increase in our population, other than from natural increase, and the extent of the country and its resources to the South, there is a clear-cut year-long campaign to achieve this objective instituted and waged with increasing vigor by Mrs. Emily Murphy, first woman to be appointed police magistrate in Canada, and who, under the pen-name of Janeey Canuck, has contributed much literature to the cause of women's advancement in the social and political life of the country."

Asked regarding the statement on the subject made in Parliament by Hon. Ernest Lapointe, Minister of Justice, Mrs. Murphy expressed her highest appreciation of the Government's action, and said it was one with which the people of Canada, for the most part, were in perfect harmony, irrespective of "class, creed, party or sex."

Russian Whites Lose Leader

General Wrangel, Enemy Of Bolsheviks, Dies At Brussels

Baron Peter Wrangel, the last hope of the Russian Whites, whose army the Bolsheviks chased into the Black Sea seven years ago, is dead.

The end came in the little suburban home to which he retired in 1926, leaving the last remnants of his command, a few Caucasians and Don Cossacks, in Jugoslavia. He suffered from intestinal trouble which affected his heart and lungs.

General Wrangel was born at St. Petersburg, now Leningrad, August 15, 1878. He was a member of a remarkable family which traced its origin to the nobility of the Balkan states as far back as 1200.

Gave Life To Aid Bremen

Floyd Bennett Dies In Quebec Hospital From Double Pneumonia

Quebec.—Floyd Bennett, one of the world's best known aviators, died in hospital here, following a severe attack of double pneumonia.

Bennett, who, in conjunction with Bert Balchen, was one of the first to try to bring tangible aid to the stranded German and Irish trans-Atlantic fliers at Greenly Island, contracted his illness as a direct result of his attempt to help his stranded fellow airmen whose plane, the Bremen, was in a disabled condition out-of-the-way Greenly Island.

Bennett had been suffering from a heavy cold prior to his take-off from Detroit and had undertaken the flight against medical advice.

His wife and son, Alexander Byrd, both of whom rushed here from New York when informed as to Bennett's serious condition, were at his bedside when he died. Mrs. Bennett herself was ill when she arrived here and was occupying a cot in the hospital, suffering from tonsillitis.

Senate Prospects

Janeey Canuck Sees Results Of Twelve Years Campaign

Edmonton, Alta.—Announcement from Ottawa, that the Dominion Parliament would take steps to amend provisions of the British North America Act so that it would be legal for Canadians to receive appointments to the Senate, came as a cheering year-long campaign to achieve this objective instituted and waged with increasing vigor by Mrs. Emily Murphy, first woman to be appointed police magistrate in Canada, and who, under the pen-name of Janeey Canuck, has contributed much literature to the cause of women's advancement in the social and political life of the country.

Asked regarding the statement on the subject made in Parliament by Hon. Ernest Lapointe, Minister of Justice, Mrs. Murphy expressed her highest appreciation of the Government's action, and said it was one with which the people of Canada, for the most part, were in perfect harmony, irrespective of "class, creed, party or sex."

CANADIAN GIRL AVIATOR

Miss Caroline Sykes, of Toronto, the first Canadian girl to make a parachute jump from an aeroplane, is the only Canadian girl attending the all-American aircraft convention in Detroit. She predicts a bright future for aviation in Canada and is anxious to become an air mail pilot.

Increase In Immigration

More Britshers Arrive and Canadians Returning From U.S.

Ottawa.—In the fiscal year ended March 31, 1928, immigration to Canada amounted to 151,537, an increase of 5 per cent. over the previous year, when it totalled 143,991. These figures were made public by the department of immigration and colonization.

During the last 12 months, as compared with the preceding year, there has been an increase in British immigration of 1,088. Immigration from the United States has increased by 3,982, and from other countries the increase has been 2,335.

A significant feature of the statistics is the increase in immigration from the United States, which was greater than the increase from all other sources combined.

During March the total immigration to Canada was 14,653, of which 3,150 were British, 2,583 from the United States, and 9,132 from other countries.

During March 2,670 Canadians who had gone to the United States to reside returned to Canada, revealing their intention of remaining permanently in this country. The number of such returning Canadians in the fiscal year was 39,857.

Norwegians Aid Canada's Development

1. A group of Norwegians photographed after having spent a few years in Canada.

2. Young girl dressed in the costume typical of her native country.

By introducing into Canada such winter sport talents as that of the Nelson brothers in ski-jumping, and others in figure skating, Norwegians won much favor and esteem in the eyes of Canadians.

Neil Nielsen, C.P.R. brakeman immediately with her minister in Washington, Hon. Vincent Massey, in respect to the endangering of lives of Canadian citizens from bullets believed to have been fired by Americans to prevent officers operating under the Volstead Act, stated Premier Mackenzie King in the House.

Mr. Massey will ask that more care be exercised by these U.S. officials.

According to S. F. Robinson, Conservative, Essex West, several times within the last month Canadians have been nearly killed by bullets from American preventive officers at the border cities of Windsor, Walkerville, and Sandwich.

At Banff and Quebec and other winter sports centers in Canada, Norwegians, as amateurs and professionals, have contributed much to native figure skating talent. They have undoubtedly shared in the training of the outstanding Canadian skaters, many of whom have won great distinction in international and world competitions.

The Canadian Pacific maintains

Automobile Racer Killed

Car Overturns When Lockhart Was Seeking New Record

Daytona Beach, Fla.—Frank Lockhart, noted automobile racer, was killed almost instantly here when he lost control of his machine while racing down the beach at more than 200 miles an hour.

On his first run, Lockhart had been clocked at 147 miles an hour. The return trip was made at a speed of 193 miles. Starting South on the beach again the machine speed was timed at 203.4 miles.

In the final trip, it was apparent that he was making more than 200 miles an hour when the racer went out of control, about 500 yards south of the beginning of the mile stretch directly in front of the grandstand.

Lockhart's machine was demolished. The car in which the famous speed king met his death was the one in which he plunged into the ocean here on February 22 last, while making an attempt to set a world's record during the annual speed trials here.

Commissioner Of Lands Dead

John W. Greenway Was Son Of Premier Of Manitoba

Ottawa.—John W. Greenway, aged 67 years, commissioner of lands, department of interior, and son of the late Hon. Thomas Greenway, former premier of Manitoba, died here.

He had been in ill health since the death of his wife, March 4 last.

Under Mr. Greenway's supervision some 10,000 square miles were taken up the West and he was largely responsible for the success of the various plans used in providing homesteads for these settlers.

Mr. Greenway was born at Berville, Ont., at the time his father was Federal minister for Huron.

The family moved to Manitoba in 1879 and after his father became premier of that province most of the management of their farm at Crystal City fell on the shoulders of the son. In 1898 John Greenway was appointed inspector of school lands in Manitoba and became commissioner of lands under the Dominion Government in 1904.

Killed By Chinese Soldier

Shanghai.—Dr. Walter F. Seymour, superintendent of the Presbyterian board of foreign missions hospital at Tsinan, Southwest of Shanghai, was shot to death by a Chinese soldier. Dr. Seymour, a graduate of Wisconsin University and Northwestern Medical School, Evanston, Ill., came to China in 1893.

Europeans Planning New Trip Across Atlantic

Completing Plans For Another Flight To North America

Dessau, Germany.—Negotiations for another flight to North America in a Junkers plane by way of Baldone, Ireland, have almost been completed. The Junkers officials, however, have declined to divulge the details, but the latest Associated Press learns that the project is being organized by Lilli Dillens, Vienna's actress who last year got as far as the Azores in the D-1230 in an effort to make the Westward passage.

The Europa, sister plane of the Bremen, which last year was compelled to land after a valiant effort to start for the U.S., will be used and will be piloted by Johanna Ristic, who was aboard the Europa on her unsuccessful attempt.

It is understood that Fraulien Dillens owns the Europa and that she will be a passenger on the new attempt.

Profits From Liquor Sales

Annual Report For Saskatchewan Shows Increase Over Last Year

Regina.—Profits from the sale of liquor in Saskatchewan in the year ended March 31 last, were \$2,443,890.68, it was officially announced on receipt of the annual report of the independent firm of auditors.

In the corresponding period one year earlier, the profits were \$2,114,866.44.

In the last 12-month period revenue from the sale of beer exceeded that from the sale of wines and liquors. Beer sales totalled \$6,174,092.25, while wine and spirits sales totalled \$5,534,442.32.

Proceeds Go To Nurse

New York.—The proceeds of a matinee under the auspices of Sir Wilfred Grenfell in a play house here, will go to Miss Great Ferris, of Saint John, N.B., who carried supplies to the Bremen fliers on Greenly Island, and afterwards through the Saint John Telegraph-Journal and the Canadian Press gave the first detailed first-hand account of their plight to the world. Miss Ferris is a nurse at the Forster Mission in Labrador.

Willing To Pay Part

Ottawa.—The Government is favorably disposed toward payment, in part at least, of amounts which may be due Home Bank depositors who have not received 25 per cent. of their claims under legislation enacted two sessions ago. This was the statement made in the House by Hon. J. A. Robt. Minister of Finance, in reply to a question by G. R. Geary, Conservative, Toronto, South.

BRITAIN NAMES SIR WM. CLARK OTTAWA ENVOY

London.—Sir William Henry Clark, comptroller-general of the department of overseas trade since 1917, has been appointed British high commissioner to Ottawa.

Sir William Clark is the eldest son of the late W. J. Clark, secretary of state, Cambridge, and is in his third year.

Sir William was educated at Eton and Trinity College, Cambridge. He has had an exceptional training in the public service. He was a clerk in the Board of Trade Department in the government in 1900; secretary to the special mission to Shanghai to negotiate a commercial treaty with China in 1901; acting second secretary in the diplomatic service in 1902; secretary to the Royal Commission on the House supply of food, etc., in time of war, 1903-5.

Sir William was private secretary at the Board of Trade to Lloyd George in 1906, and to Winston Churchill in 1908; secretary to Lloyd George as chancellor of the exchequer, 1908-10; member for commerce and industry of the council of the Viceroy of India, 1910-16, and comptroller-general of the commercial intelligence department of the Board of Trade, 1916-17.

As soon as the necessary arrangements are completed, Sir William will proceed to Ottawa.

British Columbia's Mineral Wealth Revives

1. The colossal smelter at Trail, B.C., the home of the Consolidated Mining & Smelting Company.
2. Mining class in Vancouver. Note the women prospectors.
3. A typical mining scene at the 4000 feet level.

The old mining days of British Columbia, that were as rich in output as in romance, are being revived. There is now a real mining and mineral production. In this most highly mineralized area on the North American continent, in which every conceivable mineral is found, in all phases of mining, prospecting, development and production, lode mining, placer-mining, and coal-mining, the current year is showing a healthy and vigorous activity.

The largest increases recorded are in lead and zinc, and the province possesses the second greatest lead-zinc mine in the world. Copper too shows increased production, while the everyday progress of that great company

the Consolidated Mining and Smelting Company in Trail, B.C., reads like a wonderful romance of their results.

A most significant feature of the present activity in mining is the way in which many partly developed properties and also some which have been long dormant, are now being developed. Substantial progress has been made in building main roads, motor roads which cross the provinces, while materials aids are being given in the working of mineral properties by assistance in the construction of branch roads to them. New towns are also continually being built to open up newly discovered mineralized areas for the prospector.

The British Columbia Chamber of Mines has been promoting the

welfare of the mining industry for the last thirteen years. The Chamber has on exhibition an excellent collection of the most variety of minerals mined in the province. There is also co-operation with the various prospectors' associations of British Columbia.

Many towns of the province have branch chambers of mines and the classes in mineralogy and geology as well as the mining structures are largely attended. It is of interest to learn that there are a few women prospectors attending these lectures. A Research work, too, with regard to mineral deposits is carried on continuously by the development branch of the Canadian Pacific Railway.

Here and There

(88) **Empress**, having 250,000 miles sailed around the world in the course of which she visited 18 countries and 27 ports, Canadian Pacific flagship Empress of Australia docked at New York on May 12. From that port she sailed December 2 last. She was carrying 320 passengers, including prominent society and banking leaders of Canada, Ontario and other Canadian and United States cities.

Winnipeg.—Over a thousand new homesteads have been filed in the four western provinces during the month of January and February this year, being 1,036 as compared with 1,014 for the same two months of last year. By provinces, Manitoba reports 74 homestead entries as against 71 last year, Saskatchewan 439, against 421, Alberta 562 and against 515, and British Columbia 303 against 9.

Raymond.—According to a cable from London, England, discoveries likely to be important for the Canadian beet sugar industry have been made at Oxford. A means has been found to dry the sugar canes so that allows the manufacture of sugar to be continued throughout the year, and it is believed that a method of treating the resulting effluent in such a way as to free it from poison has also come to light. The discoveries are a result of four years' research work.

Vancouver.—I am satisfied with the progress of Canadian products in the foreign trade field and particularly for the mineral trade are extremely good," Col. Moore Cosgrave, Canadian Government Trade Commissioner to China, said here on May 12. "There is no doubt that Canadian products and especially those from British Columbia are being very well received in China. There is no doubt however against Canadian goods, the Chinese merchant knows his prices and knows where to place his orders."

Announcement has been made from Canadian Pacific Railway headquarters that the "Remembrance Tour" will be held during the coming summer for ex-soldiers, their relations and friends to visit the scenes of battles in France and Flanders during the Great War. The tour begins on Monday May 13 next, on board Canadian Pacific liner "Duchess of Bedford", one of the new cabin class steamships which will be plied by the company on the St. Lawrence route this year.

A sixteen-year-old youth, Arthur Cleland Lloyd, of Vancouver, was the winner of the \$1,000 prize for orchestral suite composed for the Musical Festival to be held at Quebec on July 24-25. Three other prizes were awarded and a further \$1,000 for a cantata will be given later. The prizes, which totalled \$3,300, were the gift of E. W. Beatty, chairman of the Canadian Canadian Pacific Railway. The contest was open to all the world and compositions were received from Great Britain, France, Hungary, Denmark and the United States as well as Canada.

Ottawa may conceivably be selected as the meeting place of the Council of the League of Nations and Rt. Hon. W. L. Mackenzie King, Prime Minister of Canada, should alter his present assignment of the League in view of the fact that he paid Canada but his election to the council of the 14 leading powers of the League of Nations, was the second in St. Helena. And after seven years' financial director of the Secretariat of the League, when interviewed on the Windsor Street C. P. R. station here recently,

CHAPTER XXIII.—Continued.

"Well, there's many a good girl has come to me for without references, Mrs. Angus. I do not know where to refer for references as I once was," said Miss Ritchie. "They are often written to get rid of a girl, you know."

"No, I do not know that," said Mrs. Angus; "I prefer references."

"Well, then, here you are," said Miss Ritchie; "here's an old country girl with letters from rectors and curates and local bodies and all—she'll do fine for you."

That morning Helmi was interviewed by four other women. She was viewed with favor by the first one, who enumerated her good points without even thinking it might be embarrassing. "You look clean and smart," she said; "you know how to put your clothes on straight, and you look a person square in the eye. You are a foreigner, I see. From what country?"

"Finland," said Helmi.

"Goodnight!" cried the lady, with a harsh laugh; "then it's all off. My husband had one in his bridge gang and, a positive nuisance he was, a socialist and agitator. He would put me out if I brought home a Finn. I want a British subject, Miss Ritchie. We owe it to our own to give them the choice, though dear me some of the English girls have been a trial too."

The next woman who talked to Helmi kept boardrooming, and fancied Helmi on account of her height. "I like a tall girl—she can carry traps better. You've done it?—that's good. Yes, you are likely looking girl. I may say foreign, but still you have good English. I don't mind Finns—they're nice, but they're not strong. What's that? You want to go home at night? Why? A Baby! Nothing doing—you won't do me at all. No, sir."

If You Need A Tonic Get The Best!

Guelph, Ont.—"There is nothing better as a building than Dr. Peter Golden Medical Discovery. Several times when I was run down, I suffered from weak stomach, thin and undernourished blood, I soon got well and always obtained excellent results. It enriched my blood, relieved me of pain in the stomach, built me up with health, and made me feel like a new person."

I also found it splendid to take following each meal to gain strength. I always recommend Dr. Peter Golden's discovery to those whom I find ailing for I know them to be just as advertised."—Mrs. W. H. Skyring, 52 Nottingham St.

Write Dr. Peter's Invalid Hotel in Buffalo, N. Y., for free advice.

W. N. U. 1731

I had a girl with a baby once and it was always getting sick or dying or something just when I needed her worst. Never again! I believe in population all right, but I can't have a waitress with a baby, even if we never get the country settled. What in the world did you have a baby for, a smart girl like you?"

Helmi stared at her haughtily. "It is not your business," she said, "I can have a baby if I want it without asking you."

"You bet you can, and welcome. Well, who else have you, Miss Ritchie?"

The fourth woman who spoke to Helmi asked her many questions about her past. "Where is your husband?" she asked.

Helmi replied that she did not know. "Are you sure you are married?" Helmi produced the certificate.

"Do you ever think you may have deserted you?" the woman asked searchingly.

Helmi hesitated, and as the woman pried her questions she could only think of the brace and bit Jack used to bore holes in the boards. Helmi knew she had no right to question her, but she answered as bravely as she could, all the time praying, "Make her take me, God; Make her!"

"Well, my dear, I wouldn't be too sure. Men are fickle, I know. My first husband left me."

"My man is a good one," said Helmi firmly.

"Any family?"

"One little girl, one month old."

"Well, of course, that would be the difficulty."

"I can leave her with friends," said Helmi, eagerly. She was going panicky for her?

"Still, I have three sons, young men; it would not be nice to have a young girl who has a baby—know what boys are like—Inclined to tease."

"I like boys, good enough," said the lady, with emphasis. "I suppose they are Finnish people like yourself—simply working people."

"No, ma'am, it is a Canadian family who have been very good to me."

"Indeed," said Mrs. Swallow, "how good of them! I hope you are very grateful."

"I am," said Helmi. "I want to pay. Will you take me?"

"I will think about it. I do not like to decide in a hurry. My home is everything to me. I plan everything carefully. People tell me I am foolish, but it's my nature. Give me a chance, though. You have a photo. Oh, dear, how lovely! Let me see, I could phone me—No. 8333—that is easy to remember but I cannot just say when I will be in. Every day there is something. Really, I grow busier all the time, it seems, and one cannot refuse invitations when one accepts them. Friday evening at dinner time—we dine at seven—I think we have no dinner engagement."

Sadly disappointed, Helmi turned away. How could she wait until Friday—she must have work. It was now near twelve—surely someone would take her? She looked back and scanned the faces of the women. Miss Ritchie nodded to her encouragingly.

"I'll phone about for you when I can," she said; "there is a rush on this morning."

Just at that moment the door opened and a dainty little lady entered. She came to the desk quickly, with tiny steps, like a mechanical toy. "Oh, Miss Ritchie," she began; "Mary has left me. She quarreled with Robin, and wanted him to apologize. It is pretty hard for a big boy of seven to apologize, now, isn't it? He simply . . . He had thrown a tomato at her! It was very naughty of him, of course—just a boyish prank—and she took it so seriously. Have you some one?"

Miss Ritchie called Helmi over. "Here's the very girl for you, Mrs. Brand," she said; "she has a baby of her own, and she'll be good to the twins, I know."

"Oh, I couldn't take a girl with a baby—it would be . . ." she hesitated.

"I can work by the day and leave the baby with friends," said Helmi.

She was pale and tired now, and

If you buy Red Rose Tea in the aluminum package and you are not thoroughly satisfied, we have authorized your dealer to return your money on receipt of the container, no matter how much of the tea you have used. Order a trial package. S.W.

looked too ill to be an attracting venture for anyone looking for help.

"I am strong," said Helmi. "my baby is young, so I am pain yet. Try me for a day, then . . ."

"Well, I must ask my husband—I always consult him of course!" (Mr. Brand would have been interested in this) "and I will let Miss Ritchie know. That will be the best. I couldn't very well let you bring the baby, and it's at night I need you most."

Helmi turned to Miss Ritchie. "I must go now," she said. "A little girl minds the baby—home from school, she stayed for me."

Miss Ritchie nodded. "Better luck next time," she said; "I shall keep you in mind."

In the afternoon Helmi came back. Mrs. Corbett was not going out, so she kept the baby. But no one wanted Helmi—she was a foreigner, and she had a baby.

Kind-hearted Miss Ritchie was disinterested, and flared up in anger when one woman said to Helmi: "You should have thought of this about same last year!"

"Having a baby is not a crime, Mrs. Corbett; the poor girl is honest and willing to work. She gives service for every dollar, I'll go bail. She isn't asking charity or even sympathy."

All afternoon Helmi waited, while well-dressed women came and went. The seekers of employment sat together, and were easily distinguishable from the others. Their manner was humble and beseeching. The war with all its dislocations had thrown many women out of employment, and on the faces of many, gaunt fear was plainly written. This was particularly true of those who were the most refined and cultured.

Fragments of conversation fell around Helmi as she sat among the seekers.

Two women in seal coats were discussing the situation.

(To Be Continued.)

An OH OH ALL MEAN. The editor of the soldier, the sailorman, the huckerman, the out-door laborer, and all who are exposed to injury and the elements will find in Dr. Thomas Electric Oil a true and faithful friend. It relieves rheumatism, dress wounds, subdue lumbago and overcome rheumatism. It is excellent. Therefore, it should have a place in all home medicines and be amongst those taken on a journey.

Position Is Reversed

U.S. Will Never Be Able To Pay Debt To Britain

Nearly as many men of the British empire passed over the Menin road to the Ypres salient not only never to return but ever to lie there without a grave, unknelt, unconfined and unknown, as the United States lost by death in the world war. And we of all the universe, have reason to stand with gratitude for that gate of honor to those who perished behind it. But for their endurance and that of their comrades living and dead, it would not be a memorial of their sacrifice, but a monument to their defeat—a gate opening to the sea and our own coasts. And yet we continue to speak of their debt to us—their debt, who have put us and all the world in eternal debt to them.—New York Times

Institut on Minard's Liniment—accept no other.

Piano Is Still Popular

Radio Or Mechanical Instruments Cannot Take Its Place

When the popularity of the radio began to be manifest, many persons expressed the opinion that all musical instruments would in time become obsolete, especially the piano. But the recent statement of a New York piano company that all existing records in the piano business had been broken by the sale of \$108,000 worth of pianos in one day proves the contrary. The same prediction was made when the player-piano and the phonograph made their debut, but this extraordinary one-day sale of pianos indicates otherwise.

Centennial Celebration

Henri Dunant, Founder Of Red Cross, Winner of Nobel Peace Prize

Born Geneva May 8, 1828. Died, Paris, October 31, 1910.

French-Swiss business man and philanthropist. Author of several books.

Carefully travelling through Northern Italy in 1859, Dunant came upon the ghastly plain of Solferino where, on June 24th, 300,000 men had been engaged in a battle which had lasted fifteen hours.

Shocked into action at the sight of 40,000 dead, wounded and dying soldiers, Dunant undertook to establish a Committee of Ambulance and Nursing Service, secured funds in the neighboring town of Castiglione. With these workers, he obtained official permission to tend the wounded and dying on the field of battle, going out personally with wine, food, cigarettes, tobacco, for which he paid out of his own purse. So indefatigably did he work that, in gratitude, the invalids named him "The Good Samaritan of Castiglione."

The vision of the suffering witnessed at Solferino never left him. For three years he travelled about Europe, preaching, lecturing, writing, advocating the need of speedy reorganization of military and medical nursing service. Finally, in 1862, his little book "Un Souvenir de Solferino" appeared and startled a shocked world into the immediate need for change.

The Committee of Public Safety consequently, under the presidency and chairmanship of Gustave Moynier and Georges Duhamel, became so interested that it proposed in 1863 an International Conference at Geneva. In 1863, when 16 nations sent delegations. The meeting ended when 12 out of the 16 national representatives signed the first Treaty of Geneva, and Red Cross was established for the first time in international law. Today 59 nations subscribe to this Treaty, which grew out of the ideals of Henri Dunant.

Dunant lived a long and useful life, devoting a large fortune to the furtherance of his benevolent and philanthropic work.

C. N. R. Announces

Low Summer Fares

Round Trip Summer Excursion Fares Go Into Effect May 15th

Summer days are bargain days on the Canadian National Railways. Commencing May 15, round trip summer excursion fares goes into effect. These fares feature a reduction of from 20 to 25 per cent as compared with the regular rates as well as allowing the traveller a longer period before the date of expiration, the low fares remaining in effect until September 30.

The new rates are applicable from Pacific and prairie points of origin to all points in the east and also from prairie points of origin to the Pacific Coast. On the eastern route the option of making part of the trip by boat across the Great Lakes is permitted and the same privilege is extended to those desirous of making the boat trip between Vancouver and Prince Rupert.

Given Leave To Appear

Four organizations have been given permission to appear before the committee investigating immigration. The Anglican Synod, which recently expressed criticism of the department, the Canadian Legion (Alberta branch), the Welcome League and the Salvation Army were all given leave to appear.

Neuralgia succumbs to Minard's Liniment.

Little Helps For This Week

"Let us do good unto all men."—Galatians vi. 10.

The chief use, then in man of that he knows.

Is self-sacrifice for the good of all.

Not feebly weeping for our own-made woes.

Not sighing from a melancholy gall.

Not hating from a soul that overflows With bitterness breathed out from inward thral;

But meekly, either, to ease, to loose, or bind,

As need requires, this frail, fallen human kind.—Fulke Greville.

Power to do good is the true and lawful end of aspiring. For good thoughts, though God accept them, yet towards men they are little better than good dreams, except they be put in act, and that cannot be without power and place as the vantage ground.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe Or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether born for the first time or the growing up. They always do good. They are absolutely free from opiums or other harmful drugs and the mother can always feel safe.

Concerning the Tablets, Mrs. John Armon, R.R. 1, South Monaghan, Ont., says:—"We have three fine healthy children, to whom, when a bad cold or fever comes, we give only Baby's Own Tablets. The tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild and thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; stop wind and simple fever and make teething easy. They are sold by medical dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Greater Part Submerged
Iceberg float so that almost nine times their visible bulk is submerged. In Baffin Bay Sir John Ross saw icebergs afloat in 1,500 feet of water. Antarctic icebergs, though rarely over two hundred feet in height, are often vast plateaux, table-topped, that have been known to reach thirty miles in length.

A Real Asthma Reliever. Dr. J. D. Kellogg's Asthma Remedy has never been advertised by extravagant statements. Its claims are conservative indeed, when judged by the benefits which it produces. It relieves asthma and permanent benefits when you buy this remedy and you will not have cause for disappointment. It gives permanent relief in many cases where other so-called remedies have utterly failed.

A holy war is reported to be raging in Arabia and parts adjacent. As we understand it, a holy war is about as holy as a civil war is civil.

Toothache

Fill cavity with cotton soaked in Minard's. Also bathe the face. Quick and sure relief.

USED CAR Quality

CHEVROLET

the Result of New Car Popularity

AN unusually good selling season in the new car market always reacts to the benefit of the Used Car buyer. That holds true of the present situation.

On account of the exceptional sales volume of the new Chevrolet, we find ourselves with an extra number of really good used cars on our floor. To reduce our stock without sacrificing anything of the reputation won by our new car dealings, we have put all these cars into sound condition and are offering them at prices that compel public interest. Now is the most advantageous time to buy a good Used Car from a reputable Chevrolet dealer. Let us show you some extra attractive values.

"When Mary takes a hand," the play put on at Wudel's hall Friday evening by the Winterburn W.L. drew a good crowd, which no doubt would have been much larger but for the inclement weather. The play had been shown at Winterburn Community hall, and also at the Grove. At the finish of the play a dance was given under the auspices of the local W. I.

On Friday, April 13, to the wife of Mr. Jac Athleim, a daughter.

Meredith Bros. are buying hogs and cattle at Carvel every week.

Muir Lake Community is to have a dance and draw, which will be held in the Schoolhouse there, on Friday evening, May 4th.

M. M. Mecklenburg, the well-known optical specialist, will be at the Royal Hotel, Stony Plain, on Friday, May 11th. See him and see well.

Duffield Doings

Services were held on Sunday last in the schoolhouse under the auspices of the United Church. Mr. Sutton officiated.

Mr. Pidgeon brought his family home from Edmonton on Saturday last in his motor car.

A meeting of Inga councilors was held at Duffield on Friday last, when the question of roads was up for discussion.

At Duffield, April 24th, to the wife of Mr. Glen Catt, a son.

A big crowd attended the dance at Mewassin schoolhouse, Friday evening.

Mr. P. Faulks has received an answer to the letter he sent Supt. Macdonald re the appointing of an agent at the local station. Mr. Macdonald regrets his inability to accede to the request, as present receipts at the local station do not warrant the company going to this expense.

Investigator Jenkins, of the rail way staff, was a visitor in town on Friday.

Tyre's orchestra played at the big dance at Manly Hall, Friday night.

Arbor Day, Monday Next.

Many school grounds, parks, lawns and boulevards in the province will be improved by the planting of trees on Monday next, May 7th, which has been named by the Lieutenant Governor as Arbor Day in Alberta.

In Sunny Alberta

A Moosejaw clergyman says it's a dreary weary trip from the cradle to the grave. It may be for the unfortunate ginks who have to live in that burg, bus base in Sunny Alberta we always had a hunch that life was ethereal, unless one chose to make it otherwise. Vernon Standard.

Send Coupons In.

Wheat Pool members should arrange to send their delivery check and coupons to the head office of the Wheat Pool, Calgary, at once. These coupons must be in the office before a second payment can be made. We strongly urge members to see that their coupons are sent in.

Hoffman—Ursel

On Saturday, April 28th, Miss Minnie Ursel (daughter of Mr. & Mrs. Jac Ursel Jr.) was united in marriage to Mr. Jac Hoffman (son of Mr. & Mrs. Edward Hoffman, Rosenthal district). The ceremony was performed by Rev. Emil Eberhardt, pastor of St. Matthew's Lutheran church (Missouri Synod). After the ceremony the bridal party and a number of friends and relatives sat down to a sumptuous repast at the home of the bride's parents.

On Sunday, April 29th, a wedding took place at Glory Hills, when Miss Hennie Hutfelter became the bride of Mr. John Webber. The ceremony took place at Glory Hills Reform Church, Rev. C. H. Reppert pastor. The bride had been a resident of Stony Plain for two years.

A wedding took place at the R. C. church, North Edmonton, Monday, April 30th, when Miss Mary Paier (daughter of Mr. and Mrs. Mrs. Paier) was united in marriage to Mr. Walter Markwichow of North Edmonton. A large party of the bride's friends from Stony Plain district were in attendance.

Accident Near Carvel.

While Peter Pyrmack, of Carvel, was motoring home, Sunday morning, from attending service at the Ukrainian church, and on passing thru a cut in the road, he collided with Mike Capp, who was returning on foot from service. Pete had as a companion aboard Mr. Joe Markovich, and was following in the wake of another car. Owing to a dust cloud, he did not notice until he was right up to them, two pedestrians who were approaching him.

The motorist missed one of the pedestrians, Joe Moody, but hit poor Mike square on, blacking an eye, bruising his right shoulder, and, after getting him down, rolled the left front wheel over both legs below the knees. Mike was knocked unconscious.

During the excitement Pete swung the helm hard a-port, and put the car its own length up a pretty steep bank.

The car then fell back on its left side, breaking the steering wheel and crushing Pete in behind it. His traveling companion escaped without a scratch.

Mike Capp was carried into the nearby home of Mat Stecky, where his injuries were attended to by Dr. Walton. Mr. Pyrmack was motorized to his home at Carvel, where an examination of his injuries was made by the doctor.

Mr. R. C. Howat, of Carvel, was nearby at the time of the accident, and notified Officer Moses, who proceeded to the scene of the accident and took photographs and measurements.

Pete's car, an Oldsmobile No. 68136 is not much the worse for its hill-climbing stunt, and will be ready for the road again so soon as Pete gets rid of that pain in his side.

Spruce Grove News

A "shower" was held on Thursday evening last at the home of Mrs. Wm. McLeod, in honor of Miss Louise Biex. A large number of this popular young lady's friends were present, and a very enjoyable time is reported.

A survey party has laid out the site for the building of a new elevator at the Grove. Its location will be east of the two present elevators, close to the section men's bunk house.

On Sunday evening next, May 6, at St. Joseph's church, a Holy Hour's adoration of the Blessed Sacrament will be held. Rev. Dr. Nelligan, of St. Joseph's cathedral, Edmonton, will be present, to preach.

Having spent the winter in the West, Mr. Lorenzo Eccles returned last week, and is now engaged in farming operations.

F. Walbaum, of Woodland Dairy, Edmonton, was here Monday, arranging the cream routes for this season.

Will the party or parties who took the Fresno scraper from the road allowance two miles east of Stony, last fall, kindly return same and save further trouble? — (Signed) Councillor T. Wudel.
